

P0501 G.W.R. Benches

CHECK LIST

This kit pack contains the following:
 1 x Brown Laser (A) 1 x Cream Laser (B)
 1 x Dark Green (C)
 1 x Instruction Sheets

Instruction Sheet 1

READ THROUGH ALL THE INSTRUCTIONS BEFORE YOU START.

To construct this kit you will need the following:

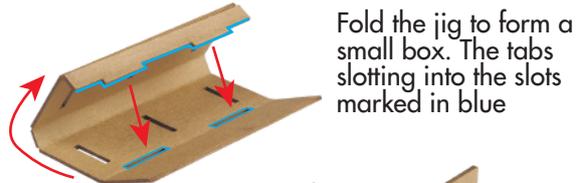

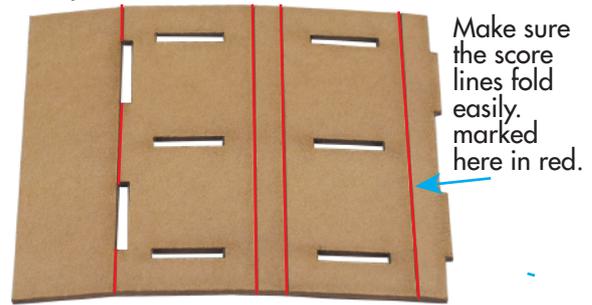

1. A Modellers knife.
2. A steel ruler.
3. Glue - UHU Solvent Free Clear Adhesive is our favourite.
4. A cutting surface - a sheet of card or a cutting mat.
5. Fine point tweezers to hold the smaller components.
6. Metcalfe UltraFine Tip Glue Bottle (Code: MT907)

EXTRACTING COMPONENTS FROM SHEETS.

To stop the components from falling off the sheets, they are held secure with small score points.
 To release the laser components *carefully* push them out from the card with the point of your tweezers. These components are delicate if they don't easily push out, hold to the light and see where the score points are located and if need be carefully cut with your knife.
 Store the released components in a separate 'Builders Yard'. This is an area kept away from your working surface, keep the components here until needed. Use a tray or thick piece of card to make your builders yard.

1 MAKING THE JIG

Lets start with the jig. This is to hold the legs in place while you attach the seat and back rails.

Like so.

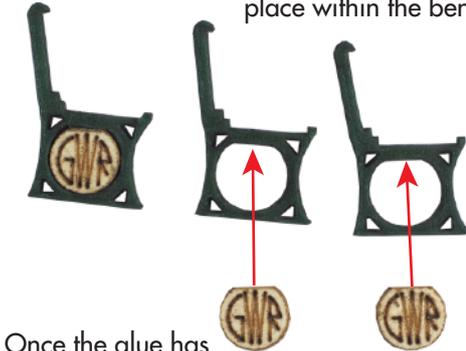

Allow the glue to fully dry before using the jig to construct the benches.

2 GWR LOGO AND BENCH LEGS

Carefully fold back the logo to make double sided.
 Score line shown here in red.

Now slot the logos into place within the bench legs.

Once the glue has dried slot the complete legs into the jig.

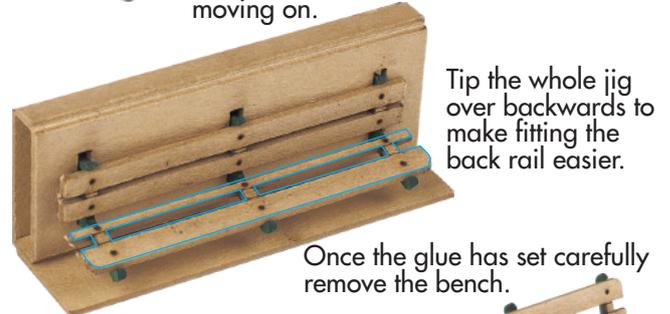

3 SEAT & BACK RAILS

Using tiny spots of glue, add the seat rail first lining up the round 'bolt' holes to the legs.

Again allow the glue to set before moving on.

Once the glue has set carefully remove the bench.

Like so.
