

### Fig. 3 - FINAL TOUCHES.

Finally **before** you cut out a canvas roof of your choice, very carefully score along the lines marked by the red arrows. You will not need to add much pressure to your knife, the weight of the knife should suffice. Practice the score before committing.

Then add the roof to the stall frames.

## P0530 Market Stalls

### CHECK LIST

This kit pack contains the following:

- 1 x Brown Laser
- 1 x Artwork Sheet
- 1 x Instruction Sheets

## Instruction Sheet 1

### READ THROUGH ALL THE INSTRUCTIONS BEFORE YOU START.

To construct this kit you will need the following:

1. A Modellers knife.
2. A steel ruler.
3. Glue - UHU Solvent Free Clear Adhesive is our favourite.
4. A cutting surface - a sheet of card or a cutting mat.
5. Fine point tweezers to hold the smaller components.
6. Metcalfe UltraFine Tip Glue Bottle (Code: MT907)

### EXTRACTING COMPONENTS FROM SHEETS.

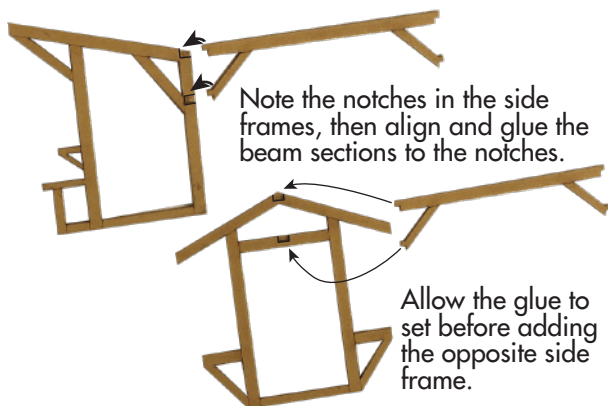

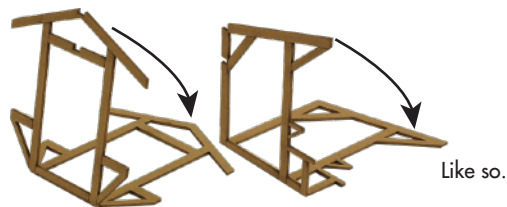

To stop the components from falling off the sheets, they are held secure with small score points.

To release the laser components *carefully* push them out from the card, these components are delicate.

Store the released components in a separate 'Builders Yard'. This is an area kept away from your working surface, keep the components here until needed. Use a tray or thick piece of card to make your builders yard.

## Fig. 1 - STALL FRAMES

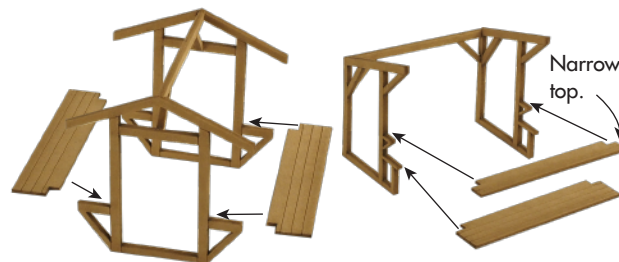

Start off by folding back and gluing together the 2 pairs of side frames .

© Copyright 2017.

## Fig. 2 - STALL COUNTERS

Now add the counter tops, there are 3 wide and 1 narrow. 2 wide tops go with the centre stall and 1 wide and the 1 narrow for the side stall.

The tops fit to the braces, with the counter top notch sliding to the inside of the frame. The narrow top fits to the smaller top brace on the side stall.

If you'd like to add some produce to the counter tops then cut out one from the selection on the artwork sheet and glue to the underside of the box frame.
